METALLOMICS 2013

On behalf of the organizing committee, we are very pleased to invite you to participate in the 4th International Symposium on Metallomics 2013. The conference will be held in the Calatrava Congress Centre in Oviedo, Spain, from Monday, 8th July, to Thursday, 11th July 2013. It will continue in the tradition of the outstanding previous meetings (1st ISM 2007 in Nagoya, Japan, 2nd ISM 2009 in Cincinnati, USA, and 3rd ISM 2011 in Münster, Germany) and will bring together scientists from all over the world discussing on the various aspects of metallomics. Scientists across the broad spectrum of metallomics (biology, biochemistry, chemistry, medicine, physiology, toxicology, etc.), including those from industry, government, and academia, are therefore encouraged to form part of this exciting series of conferences, aiming at a multidisciplinary encounter.

The meeting will include invited presentations of well-known colleagues trying to cover the entire spectrum of metallomics and oral presentations.

Special emphasis will be placed on poster sessions, in which preferably young scientists will have the great opportunity to discuss their work in a stimulating and relaxed atmosphere. The poster sessions will include the exhibition of scientific instrumentations and support presented by the world-wide leading suppliers. A number of basic short courses will be also provided. The programme will be completed by an attractive social programme for attendees and accompanying persons encouraging you to discover Asturian's landscape and traditions.

We are looking forward to welcoming you in Oviedo in July 2013.
