5th. INTERNATIONAL SYMPOSIUM ON TRACE ELEMENTS IN HUMAN: NEW PERSPECTIVES

**8-10 October 2005
ATHENS – GREECE**

The Organizing Committee and the University of Athens organize the "4th. International Symposium on Trace Elements in Human: New Perspectives"

The rapid growth in importance of trace elements in biology and medicine needs the discussion of the recent developments in this field.

The aim of this symposium is to emphasize the influence on trace elements on human health and to find an answer to some of the following questions:

- What are the "human essential trace elements"?
- How do trace elements act on the organism?
- Deficiency or increase intake: what will be the consequences for the human health?

Main topics

- Essentiality of trace elements
- Trace elements and biochemical processes
- Interactions between trace elements
- Trace elements and health: Nutrition, environment, influence of deficiency or increased intake
- Trace elements: methods of detection.
